

FOX

Diode laser

The world's first diode laser
with output calibration

- Power calibration at fiber distal tip
- Green aiming beam
- Video screen capability

**A.R.C.
LASER**

enlighten your surgery.

Calibration at the distal tip of the fiber = safe and accurate treatments

- The new FOX laser calibrates the output at the distal tip of the fiber with it's own power meter. The laser will automatically adjust to deliver the selected Power displayed. FOX is the worldwide leader in providing the most advanced and unique features.
- Change fibers and get your new calibration
- This sets a world wide standard

CALIBRATION ASSURES SAFETY

Power selected on the display:	8,00 W
Fiber transmission	88,00 %
Verified power output:	7,04 W

Always calibrated!

**Not without
my FOX!**

Expand your office services with the FOX.

Unlimited benefits offered by the FOX.

Partner with us to develop new advancements.

Treatment at
your finger tips

- Green aiming beam for pinpoint accuracy
- Superior performance for maximum utilization
- Store up to 99 treatment protocols in memory
- Video library is available via USB Flash Drive
- Battery operation enables unlimited range of usage

Wavelength Options:
810, 940, 980, 1064 nm

A.R.C. LASER STRIVES FOR PERFECTION

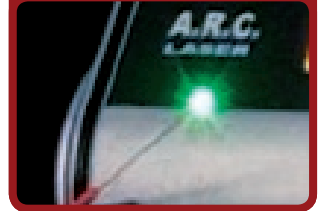

VERSATILE

- 11 W output at distal tip (980nm)
- Micro pulse settings down to 100 μ s
- Fiber delivery for maximum maneuverability
- Green aiming beam for enhanced visibility
- Small, lightweight and transportable

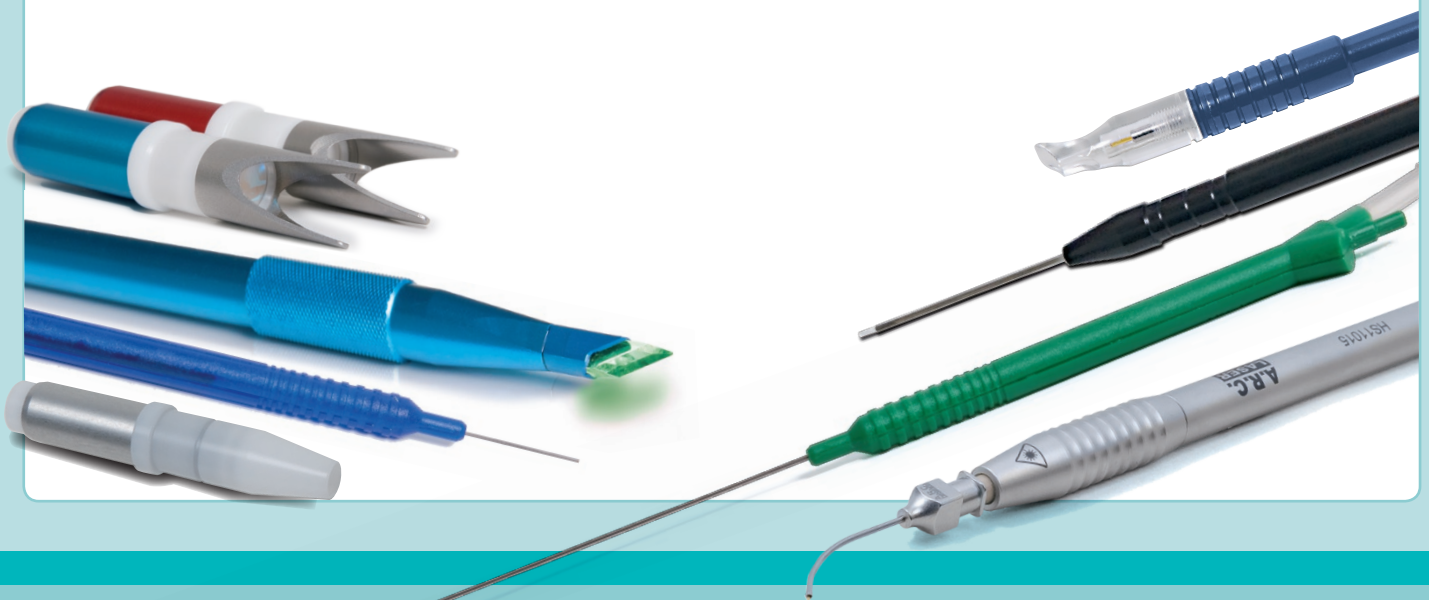

Fox with JAZZ scalpel

FOX is the first laser with a Green aiming beam that is highly visible in ALL treatment fields.

Ergonomically designed hand pieces and delivery systems enable multiple treatment options. With the patented fiber connector, fiber change is quick and easy without compromising performance. A selection of disposable or reusable attachments are available, including the JAZZ Sapphire scalpel.

Select your Application: Dermatology, Surgery, Ophthalmology, Aesthetic, etc.

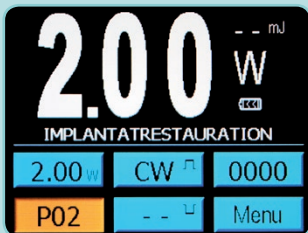

DIFFERENT SYSTEM OPTIONS

- Aesthetic
- Dental
- ENT
- Ophthalmology
- Veterinary

Precise Incision	Coagulation
Ablation	Tissue Remodeling

FOX meets patient needs and the needs of modern surgery because of a collaboration

between the designer and the physician to create more advanced, affordable devices.

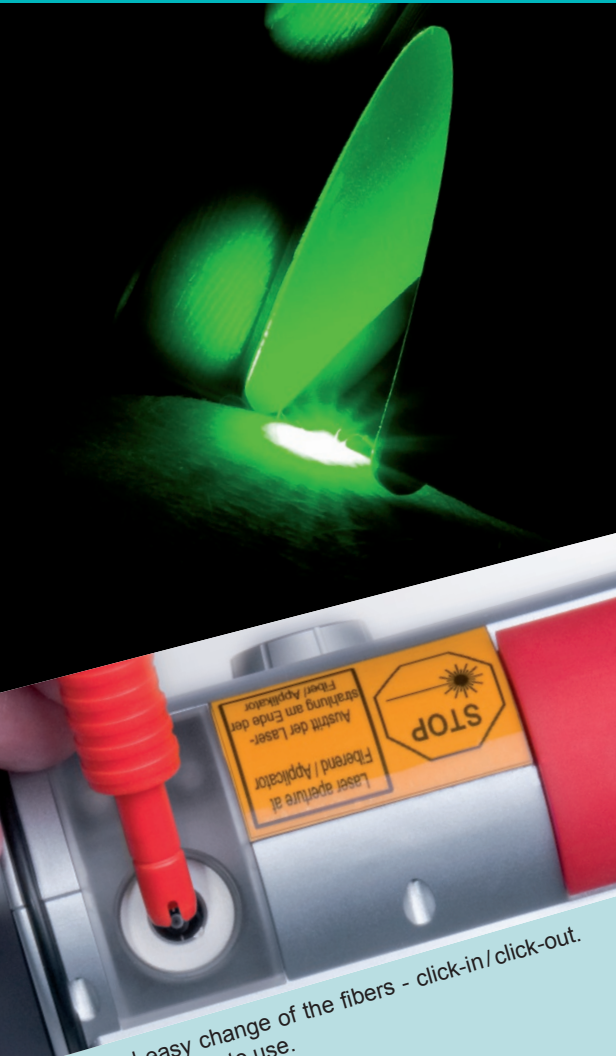

TOUCH-SCREEN Selection of treatment parameters is easy with the "highlight and touch" screen display.

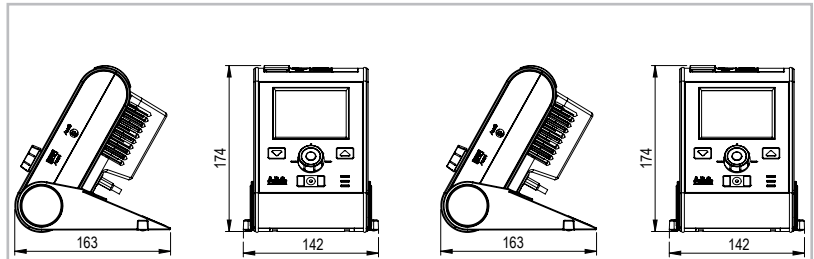

VIDEO The FOX video library can be accessed from a USB Flash Drive and played on the display screen, including the latest surgical procedures.

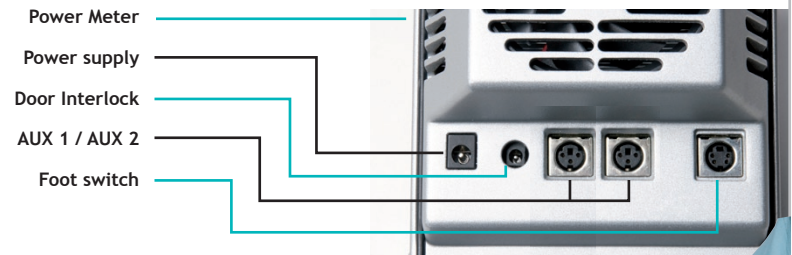

Fast and easy change of the fibers - click-in / click-out.
Adjusted - ready to use.

FOX laser and accessories are stowed in a durable carrying case.

TECHNICAL SPECIFICATIONS

Wavelength/Power*	810 nm	9 Watt
	940 nm	5 Watt
	980 nm	11 Watt
	1064 nm	10 Watt
Pulse width / adjustable	1 ms to cw	
Pulse Intervall	1 ms to 1 sec.	
Aiming beam	Green 532 nm, < 2 mW	
Dimensions (WDH)	142 x 174 x 163 mm	
Weight	1,2 kg betriebsbereit	
Input voltage	Integrated batteries, rechargeable	

* at the distal end

Specify wavelength at order. Changes in design and specifications to enhance performance will be incorporated without any further notice.
